MESSAGE FROM THE DIRECTOR

Dear Friends, Associates, Fellow Innovators, Inventors and Fellow Citizens, 2015 & 2016 where incredibly productive years and we have to thank you for that.

Your gift of time, talent and treasure allowed us to complete our missions, more than ever before!

As this annual report illustrates, the work you have so generously supported have placed our country, Qatar in the "world map" being recognized as a country not only rich in natural resources and being one of the country in the world having the highest GDP per capita.

Despite of our county's inherent wealth, Agri-Green Foundation pursued to undertake research and supported students and other researchers to develop projects geared towards our country's economic sustainability in terms of innovating alternate sources of basic necessities.

While our achievements will help our country's sustainability, we also be able to be of help to other neighbouring countries in the Middle East, North Africa, Asia and other parts of the world.

Once again, thank you very much, and I hope this annual report conveys the impact we had in 2015 & 2016 and shall provide you the awareness of how we translate into action our stated GOAL and OBJECTIVES.

I hereby reiterate my appreciation for your support and interest in Agri-Green Foundation.

Adnan Fahad Rashid Al Ramzani Al Naimi
Founding Director

Agri-Green Foundation

Introduction

Agri-Green Foundation was conceptualized by Dr. Adnan Al Ramzani Al Naimi as a long-term goal for Agri-Green, as a company started in 2011. After the filing process for Agri-Green invention which had received more than a hundred and seventy (170) Gold Medals, Gold cups, Trophies, different type of certificates and other gold awards, Dr. Adnan, the Inventor persevered to organize and lead Agri-Green Foundation and conducted numerous trainings and seminars for young inventors, all over the State of Qatar, some of the Neighbouring Countries and Germany, a very valuable support to educational institutions, local and international.

Being inspired by the numerous awards received from various local, regional and international organizations, for the past five (5) years, Dr. Adnan, spearheaded the Agri-Green Foundation without funding from the State of Qatar as well as other organizations. The Agri-Green Founding members and the Board of Trustees of the organization are volunteers and funding is supported by Agri-Green Company, a company organized and managed by Dr. Adnan Al Ramzani Al Naimi and started in 2010 for his inventions implementation which will directly finance Agri-Green foundation.

The Qatar Scientific Club, Two Ministries and one the international company in the state of Qatar where voluntarily restructured under Agri-Green Foundation consultations and supervision, as the target is to introduce the innovation awareness in the body of those entities.

During last five years' presentations where carried out to different age and genders, in the sport clubs and cultural clubs, Schools and privet company, in the field of the National Vision, Sustainable Development, Carbon Dioxide Emission (CO₂), Innovation, Challenge, Creativity, Competition and How to be a Good Inventor.

Our Mission

Our mission is to help and assist young inventors to turn their creativity into ideas that can solve problems that will lead to the sustainability, environmental protection and Human requirements.

It is also the mission of Agri-Green Foundation to strengthen research and development in the State of Qatar by bringing research results from various Universities and Research Centeres to the end users, the entrepreneurs and farmers by translating them to terms that can be easily understood by the common people likewise inspiring them and helping them to increase the agricultural production and other business in the State of Qatar.

Furthermore, our mission is to support inventors in the various stages of their invention development from the initial stage of their invention until the manufacturing and marketing stage. This is a very crucial stage of development as most inventors felt the frustrations when their inventions could not get the needed support psychological, emotional, institutional and most of all financial support to inspire young inventors to bring out their creativity into reality.
